

“INF Special Procedures: Trader” eLearning module

INF Special Procedures: Customs Officer & Trader

Course takeaways

This course guides you through the INF -Special Procedures, the functionalities of the system and legal provisions.

By the end of this course, the learner will understand INF general aspects, the specific information about INF Special Procedures for Customs Officers and Traders. The learner can rehearse the concept of UCC Special procedures, especially the inward and outward processing.

This is a quick and handy summary of the most relevant module information:

1. Introduction

1.1 Target audience and Learning outcomes

By the end of this course, you will have learned about:

- the basic principles of the use of the INF system,
- the general functionalities, and
- the benefits of the new system
- how to apply the tasks of the Trader within the INF system.

Although this course focusses on explaining the INF system (INF SP and EU Customs Trader Portal for INF) and its functionalities, it also includes a summary of the inward and outward processing concepts and related legal provisions.

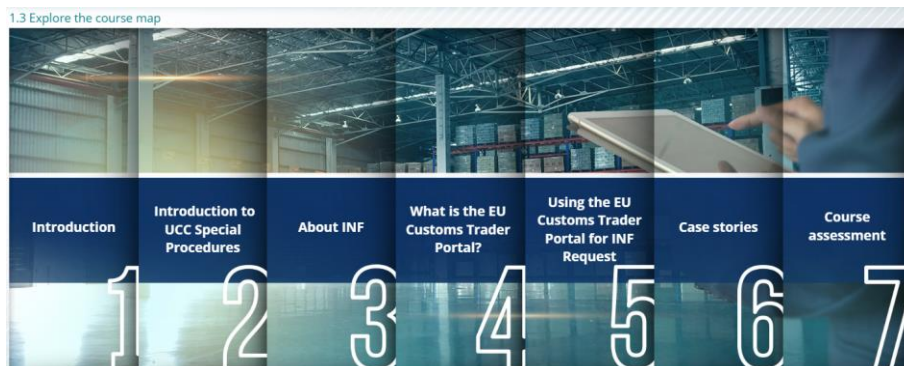

1.2 The training context

This course is part of the UCC eLearning Programme at Level 3. You can consult other courses on the [Customs and Tax eLearning portal \(europa.eu\)](http://europa.eu).

1.3 Explore the course map

The course map allows users to quickly access the main chapters of the course. The course map is conveniently placed in the horizontal toolbar located on the upper side.

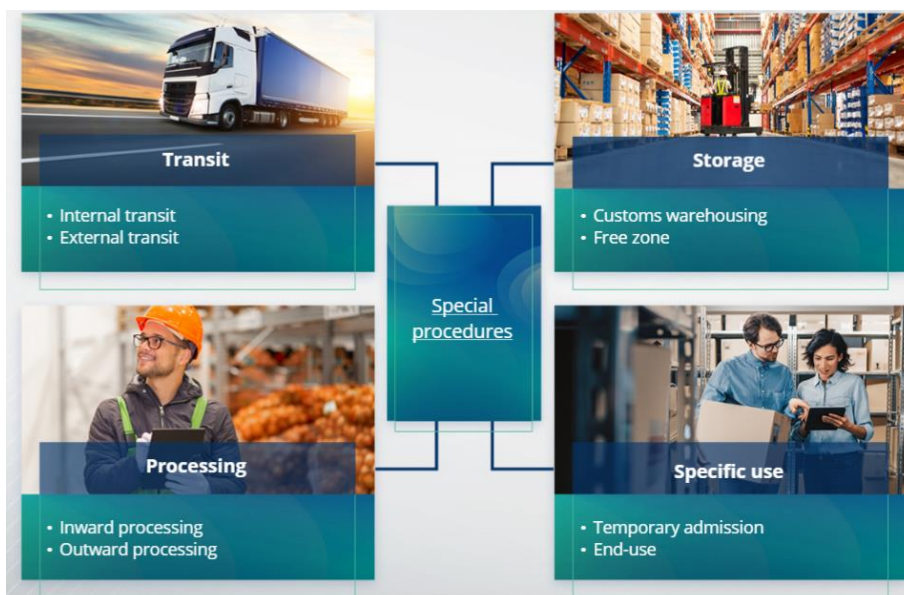

Commented [LG1]: Change screenshot, this is not the new course map

2 Introduction to UCC Special Procedures

2.1 Introduction

2.2 What is the inward processing?

Inward processing means to import non-Union goods into the customs territory of the Union and to process these goods under duty and tax suspension with a view to re-export the processed products, release them for free circulation or release the waste of the processed products.

2.3 What is the outward processing?

Outward processing means to take Union goods outside the customs territory of the Union with the view to benefit from a lower, or no duty when the goods are released for free circulation on re-importation into the customs territory of the Union.

Not all Union goods can be placed under outward processing. In order to avoid unjustified financial advantages, the UCC excludes the use of the outward processing procedure in cases where the goods have already benefitted from other financial advantages such as remission of import duties, export funds, duty exemption, and reduced rate of duty or other.

There are also some situations in which outward processing applies to repaired goods.

3 About INF

3.1 About INF System

The Supervising Customs Office (SCO) makes the relevant data elements available in the system. Where a customs declaration or re-export declaration refer to an INF, the competent Customs Authority will make the specific data elements available in the electronic system for INF. Where the responsible Customs authority has requested a standardised exchange of information for goods placed under inward processing that involves only one Member State, the SCO will make the relevant data elements available in the system.

The customs authorities will disclose updated information concerning the INF to the holder of the authorisation at this request.

3.2 INF processing

4 What is the EU Customs Trader Portal?

4.1 Description and benefits of the EU Customs Trader Portal

- The **EU Customs Trader Portal** provides a user interface to the Traders with the possibility to navigate to the specific modules (as for example INF) and to access the available actions in order to start the communication with the Customs Authority.
- The implementation of the EU Customs Trader Portal **reduces paper-based transactions** and **harmonises the Trader interfaces** by offering a single access point for trade. The different modules will operate in a seamless and uniform way in order to give the Trader a **coherent user experience**.

```
graph TD; A[By using the EU Customs Trader Portal, the traders can:] --> B[1. Navigate to the specific EU Customs Trader Portal modules from the generic one.]; A --> C[2. Access the available actions in order to start the communication with the Customs Authority. Example of actions: Create an INF-STP request.]; A --> D[3. Customise his/her trader preferences (e.g. layout preferences, notification preferences).]; A --> E[4. Have a generic view of his/her notifications (both informational and notifications linked to tasks) and submissions.]; A --> F[5. Query, filter, sort and paginate his/her notifications and submissions.];
```

1. Navigate to the specific EU Customs Trader Portal modules from the generic one.

2. Access the available actions in order to start the communication with the Customs Authority. Example of actions: Create an INF-STP request.

3. Customise his/her trader preferences (e.g. layout preferences, notification preferences).

4. Have a generic view of his/her notifications (both informational and notifications linked to tasks) and submissions.

5. Query, filter, sort and paginate his/her notifications and submissions.

Request for INF should be made now by using the EU Customs Trader Portal for INF where an import or export operation is actually envisaged.

- ✓ Access to all information about their request easily and in unique place
- ✓ Possibility to insert a new INF request to the customs authorities
- ✓ Possibility to support his/her request with the provision of particulars
- ✓ Receive notifications to be informed about the process

- ✓ Save draft versions
- ✓ Paperless process
- ✓ Electronic filling of their records

5 Using the EU Customs Trader Portal for INF Request

5.1 How to access the EU Customs Trader Portal for INF Request?

The traders or their customs representatives are directed in UUM&DS, where they will have to enter their credentials.

5.2 EU Customs Trader Portal for INF Request

INF module in the EU Customs Trader Portal allows the trader to:

- ✓ Request for provision of INF information
- ✓ Insert INF request

[illegible]

5.3 Insert INF-STP request

The trader can insert an INF request by filling out the relevant form from the portal.

Some data will automatically appear if the authorisation has been inserted in the Customs Decision system. Good and processed products can be entered manually or with the help of a template. If the user enters exceeding quantities, the system will send a warning message, but it will allow the user to continue with the submission of the form. If the customs officers ask for particulars, the trader can provide the additional information in the system.

5.4 Request from Provision of INF information

The trader can provide a valid INF number and request to view the relevant information and the status about that specific INF.
